# Zhiqing Pan | 潘志清

Brief Introduction

I have hands-on skills and experience in WebGIS development, as well as spatial data processing and visualization.

Projects

- WebGIS : RVGeo, a TypeScript library for spacial information analysis and visualization(demo). RVScripter, a web map rendering framework similar to Leaflet.js(demo).
- spatial data processing and visualization : Shanghai Commuting Patterns Unveiled through Shared Bicycle Data
- Medical imaging & Machine learning:
  - Contributed to optimizing the development experience of the Cornerstone3D front-end medical imaging rendering framework. GitHub link
  - Co-authored the paper "Knee Cartilage Image Segmentation Based on Improved U-Net by Fusing Axial Attention." (Currently under review)
